B = Petroli / D = Diesel / AB = AdBlue / H = hand wash only

Washing. Servicing. Refuelling.

Washing

Clean vehicles promote our image!

We have a wide range of car wash locations that are fitted with the latest technology. Our washing systems are suitable for all types of commercial vehicles. They gently clean the exterior of the vehicle to the highest standard. The washing tunnels are equipped with a combination of pre-soak spray arches and high-pressure jets, so in conjunction with a thorough manual pre-wash, they guarantee excellent washing results. The concept of our washing systems is eco-friendly. Thanks to their own water treatment facilities, they only use 20 % fresh water to complete the cleaning process.

Opening hours are available on request.

Servicing

Safety is of paramount importance to us!

In addition to servicing and reconditioning your vehicles, we place a huge amount of importance on safety. You can also check tyre pressure at the service stations. Vacuum cleaners are available if you want to clean the inside of your vehicle. Regular cleaning contributes greatly to retaining the value of your vehicle.

Refuelling

Efficiency thanks to an ample number of petrol stations!

Our petrol stations are located at convenient sites throughout Switzerland. Fill up on quality fuels at the service stations – AdBlue is available at selected stations.

Payment options

We can offer you the following payment options:

- Single wash for payment in cash.
- 10 washes for payment in cash. If you procure more than 5 subscriptions, you can pay by invoice. The vouchers are valid for all vehicle washing facilities that are part of the Planzer Group.
- Large fleets (from 5 trucks) can wash and refuel at our stations on account (by monthly invoice).
